

Aktiia Welcomes Dr Jay Shah as Chief Medical Officer

[Switzerland, January 2022] Aktiia expands as they add a Chief Medical Officer to their team.

Recently, the company welcomed Dr Jay Shah as their Chief Medical Officer.

Dr Shah is an experienced medical leader with over 15 years of diverse medical expertise and leadership in multiple practice settings. He completed his medical training in Internal medicine at Massachusetts General Hospital and a fellowship in Cardiovascular Diseases at Washington University School of Medicine.

Not only this, but he is also on faculty at the Mayo Alix School of Medicine and is the Medical Director of the Aortic Disease Program.

Aktiia is very excited to welcome Dr Shah as part of their team as of the 3rd of January 2022.

About Aktiia

Aktiia was founded in Switzerland in May 2018 out of a passion to create the best tool for the diagnosis and treatment of hypertension. Aktiia's founders, Mattia Bertsch (COO) and Josep Solà (CTO), previously contributed to research and development at CSEM, a prestigious Swiss research institute. For 18 years they worked tirelessly to understand the language of our heart signals and decode key markers to gain better insight into blood pressure. They built an incredible team and founded Aktiia to turn their years of pioneering work into a useful tool for people around the globe.

Aktiia's technology combines common optical sensors and proprietary clinically validated algorithms to measure blood pressure at the wrist. Validated through extensive trials in acute and low-acute settings, its accuracy has received worldwide acknowledgement, enabling Aktiia to proudly offer the most complete and user-friendly blood pressure companion to date. With one-third of adults globally suffering from hypertension, this mission is more urgent than ever.
